SPECIAL SCIENTIFIC REPORT–FISHERIES No. 176

UNITED STATES DEPARTMENT OF THE INTERIOR
FISH AND WILDLIFE SERVICE

EXPLANATORY NOTE

The series embodies results of investigations, usually of restricted scope, intended to aid or direct management or utilization practices and as guides for administrative or legislative action. it is issued in limited quantities for official use of Federal, State or cooperating agencies and in processed form for economy and to avoid delay in publication.

United States Department of the Interior, Fred A. Seaton, Secretary
Fish and Wildlife Service, John L. Farley, Director

Washington, D. C.

July 1956

ENGLISH TRANSLATIONS OF FISHERY LITERATURE
Further Listings

This report is a continuation of a series begun by W. M. Chapman during his association with the Washington State Department of Fisheries. The series was initiated to provide fishery investigators with information on the amount and availability of English translations of fishery literature.

The first two sections of this series have been issued by the Washington Department of Fisheries, Smith Tower Building, Seattle 4, Wash., and copies may be obtained on request to that agency. The third and fourth reports, undertaken with the cooperation of the above agency, were published by the U.S. Fish and Wildlife Service as Special Scientific Report--Fisheries Nos 35 and 72, and are available from the Washington office of the Service.

Those who wish to contribute to future issues may send their translation references to the compiler at U.S. Fish and Wildlife Service, Boothbay Harbor, Maine. The necessary bibliographic information on each translation should be submitted as follows:

1. Author.
2. Date.
3. Title in the original language, if the English alphabet is used; otherwise, a direct translation into English rather than transliteration into the English alphabet in such cases as Japanese, Russian, etc.
4. Name of the journal, series, or institution responsible for the publication, if contained in a serial.
5. Volume, number of pages, and place and date of printing (the latter to be given if it is not the same as the date of the article or serial).
6. Name of translator and translator's address (when possible).
7. Whether translation is complete or partial.
8. Number of pages of translation.
9. Where the translation may be obtained and the cost, if any.

As in the previous four sections, the compiler does not assume responsibility for the accuracy or completeness of the translation references. In all cases, the translations of the publications are assumed to be complete, unless otherwise indicated.

To conserve labor and space, certain abbreviations have been used throughout to indicate where and how the translations can be obtained. They are as follows:

ABS: Fishery Research Board of Canada, Atlantic Biological Station, St. Andrews, New Brunswick, Canada. Translations are available on interlibrary loan.

BMAF: British Ministry of Agriculture, Fisheries and Food, Lowestoft, England. Those who desire translations from the Lowestoft Library should send their request to the Branch of Fishery Biology, U.S. Fish and Wildlife Service, Wash., 25, D.C.

FRI: Fishery Research Institute, University of Washington, Seattle, Wash. Translations are available on interlibrary loan.

FWS: U.S. Fish and Wildlife Service, Washington 25, D.C. Translations available on interlibrary loan.

PBS: Fishery Research Board of Canada, Pacific Biological Station, Nanaimo, British Columbia, Canada. Translations are available on interlibrary loan.

SHD : Scottish Home Department, Fishery Laboratory, Aberdeen, Scotland. Translations available on interlibrary loan. (many of these now available at FWS. see Page 2 SSR:F 227)

STC : Scientific Translations Center, Library of Congress, Washington 25, D. C. Translations can be purchased.

(1) Alander, Harald. 1949. Betydelsefull nykonstruktion för trålfisket (Important new contraption for trawl fishing). Svenska Västkustfisk., årg. 19, nr. 16, s. 322-323. Translation 2 pp. by G. Davies, available SHD.

(2) Alfonsi, B. 1928. Inquinamenti delle acque navigabili dovuti a combustibili liquidi (Polluting of navigable waters due to the use of liquid combustibles). Boll. di Pesca, vol. 4, no. 6, pp. 615-629. Translation summary 2 pp. by G. Mares, available PBS.

(3) Altnöder, K. 1932. Bericht über die III und IV Untersuchungsfahrt zur Feststellung des Vorkommens der Herbstheringslarven in den Laichperioden 1930 und 1931 (A report on the 3rd and 4th investigation cruises for the establishment of the occurrence of the larvae of autumn herring during the spawning period 1930 and 1931). Ber. Deutsch. Wiss. Komm. Meeresforsch., N. F., Bd. 6, S 90-106. Translation 8 pp., available SHD.

(4) Anastasevich, V. S. 1946. The nature of an undersea echo (in Russian). Zhur. Tekh. Fiz. (SSSR), vol. 16, no. 3, pp. 371-373. Translation by E. R. Hope, Defense Scientific Information Service, Defense Research Board of Canada, available ABS.

(5) Andreu, Buenaventura. 1948. Algunos datos sobre la fecundidad de la sardina (Some data on the fecundity of the sardine). Bol. Inst. Español Oceanogr., no. 4, 5 pp. Translation 5 pp. by Juan L. de Obarrio and Leslie W. Scattergood, available FWS.

(6) Andreu, B., J. Rodriguez-Roda, and M. Gomez Larraneta. 1950. Contribucion al estudio de la talla, edad y crecimiento de la sardina (Sardina pilchardus Walb.) de las costas espanolas de Levante (Noviembre 1949-mayo 1950) (Contribution to study of size, age and growth of the sardine (Sardina pilchardus Walb.) from the eastern coasts of Spain, November 1949-May 1950). Publ. Inst. Biol. Apl., Barcelona, tome 7, pp. 159-189. Translation summary 6 pp. by G. Mares, available PBS.

(7) Andriiashev, A. P. 1954. Fishes of the northern seas of Russia (in Russian). Guides to SSSR fauna. Zool. Inst. Akad. Nauk SSSR, no. 53, 566 pp. Translation of sections on Scorpaenidae, 18 pp., by C. Richard Robius, available ABS.

(8) Anonymous. 1910. Zur Frage der Wanderungen unserer Seefische (Concerning the question of the migration of our marine fish). Fischerbote, 2 Jahrg., S. 328-330. Translation 2 pp., available SHD.

(9) Anonymous. 1949. Besonderer Fang (Lampris guttatis) (A strange catch). Fischereiwelt, 1 Jahrg., Heft 4, S. 62. Translation 1 p. by A. Turner, available SHD.

(10) Anonymous. 1950a.
Food groups of benthos and their importance in the bottom biocenoses of the Barents Sea (in Russian). Vestnik Akad. Nauk SSSR, vol. 12, pp. 109-111. Translation 5 pp. by L. Birkett, BMAF, available FWS.

(11) Anonymous. 1950b.
Elac-Fischlupe. Fischereiwelt, 2 Jahrg., Heft 3, S. 37-38. Translation 2 pp. by Irene Anderson, available SHD.

(12) Anonymous. 1950c.
Gedanken uber das pelagische Schleppnetz (Thoughts about the pelagic dragnet). Ibid., Heft 5, S. 73-74. Translation 3 pp. by Irene Anderson, available SHD.

(13) Anonymous. 1950d.
Tintenfische bedrohen die Nordsee (Cuttlefish threaten the North Sea). Ibid., S. 80. Translation 1 p. by A. Turner, available SHD.

(14) Anonymous. 1950e.
Fischlotungen in Ausland (Fish sounding abroad). Ibid., Heft 6, S. 89-90. Translation 2 pp. by Irene Anderson, available SHD.

(15) Anonymous. 1950f.
Neue Schleppnetzschwimmer (New dragnet floats). Ibid., S. 90. Translation 2 pp. by Irene Anderson, available SHD.

(16) Anonymous. 1950g.
Kontinuierlicher Fischfang (Continuous fish catching). Ibid., Heft 11, S. 169-170. Translation 2 pp. by John R. Smith, available SHD.

(17) Anonymous. 1950h.
Beschribung and Bedienungsanweisung für Hochfrequenzlotanlage mit Fischlupe (Description and instructions for use for high-frequency installation with the Fischlupe). Electroacustic G.M.B.H., Kiel. Translation 9 pp., available SHD.

(18) Anonymous. 1950i.
Elac-Fischsuchanlage mit Fischlupe (The Elac fishfinding apparatus with Fischlupe). Ibid. Translation 7 pp., available SHD.

(19) Anonymous. 1950j.
Praktiske fiskeforsøk 1945-1949 (Practical fishing experiments 1945-1949). Årsberet. vedk. Norges Fisk., 1949 (1950), nr. 7. Partial translation of pp. 5-57, 88-154 through BMAF, available FWS.

(20) Anonymous. 1951a.
Praktiske fiskeforsøk, 1950 (Practical fishing experiments, 1950). Ibid., 1950 (1951), nr. 5. Partial translation 15 pp. of pp. 21-23, 66, 85, 94-100, and 116-119 through BMAF, available FWS.

(21) Anonymous. 1951b.
Neue englische Beobachtungen an Schleppnetzen während des Fischens (Recent English observations of trawls during fishing). Fischereiwelt, 3 Jahrg., Heft 9, S. 144-145. Translation 2 pp. by Irene Anderson, available SHD.

(22) Anonymous. 1951c.
Nouveautès techniques dans l'industrie de la pêche - les filets de pêche en nylon (New techniques in the fishing industry--nylon nets). Pêche Maritime, no. 878, pp. 204-205. Translation 3 pp. by D.D. Seaton, available SHD.

(23) Anonymous. 1953.
Künstliches Licht und Schall in der Fischerei (Artificial light and sound used for fishing). Fischwirtschaft, 5 Jahrg., Heft 7, S. 171-175. Translation 2 pp. by John Smith, available SHD.

(24) Anonymous. 1954.
Wird bei Thunfischen durch Herausnahme der Kiemen die Qualität gefördert? (Is the quality of tunny improved by taking out the gills?). Ibid., 6 Jahrg., Heft 9, S. 213. Translation 1 p. by Irene Anderson, available SHD.

(25) Anonymous. 1955a.
Fisheries agency formally announces authorization for fishing in the North Pacific (in Japanese). The Hokkai Suisan, Hakodate, Japan, December 10, p. 1. Translation 3 pp. by Robert Y. Ting, available FWS.

(26) Anonymous. 1955b.
Salmon caught by drift-nets and set-nets belong to the same group (in Japanese). Ibid., December 17, p. 2. Translation 3 pp. by Robert Y. Ting, available FWS.

(27) Arasaki, S. 1950a.
Studies on the ecology of Zostera marina and Zostera nana (1) (in Japanese). Bull. Jap. Soc. Sci. Fish., vol. 15, no. 10, pp. 567-572. Translation 9 pp. by Bureau for Translations, Department of Secretary of State for Canada, available ABS.

(28) Arasaki, S. 1950b.
Studies on the ecology of Zostera marina and Zostera nana (2) (in Japanese). Ibid. vol 16, no. 2, pp. 70-76. Translation 19 pp. by Bureau for Translations, Department of Secretary of State for Canada, available ABS.

(29) Bahamonde, Nibaldo. 1948.
Algunos datos sobre la langosta de Juan Fernandez/ Some data on the spiny lobster of Juan Fernandez(Jasus frontalis M. Edw., 1837)/. Rev. Biol. Mar. Chile, vol. 1, no. 2, pp. 90-102. Translation summary 7 pp. by G. Mares, available PBS.

(30) Bahr, Klaus. 1952.
Gegebenheiten und Möglichkeiten des deutschen Thunfischfanges (Given conditions and possibilities of German tunny-catching). Fischwirtschaft, 4 Jahrg., Heft 12, S. 238-239. Translation 2 pp. by Irene Anderson, available SHD.

(31) Barsukov, V. V. 1953.
On the biology of reproduction of the White Sea wolf-fish (Anarhichas lupus L.) (in Russian). Zool. Zhur., vol. 32, no. 6, pp. 1211-1216. Preliminary translation 10 pp. by W. E. Ricker, available PBS.

(32) Beklemishev, K. V. 1950.
The feeding of Nereis Pelagica and the functional role of its maxillary apparatus (in Russian). Dok. Akad. Nauk SSSR, vol. 73, no. 5, pp. 1093-1095. Translation 3 pp. by L. Birkett, BMAF, available FWS.

(33) Bert, Paul. 1871.
Sur les phènomènes et les causes de la mort des animaux d'eau douce que l'on plonge dans l'eau de mer (On the phonomena and the causes of death of fresh-water animals that are immersed in sea water). Compt. Rend. Acad. Sci. Paris, tome 73, pp. 382-385 and 464-467. Translation 11 pp. by Julius Rockwell, Jr., available FRI.

(34) Bert, Paul. 1883.
Sur la cause de la mort des animaux d'eau douce qu'on plonge dans l'eau de mer et reciproquement (On the cause of death of fresh-water animals that are immersed in sea water and vice versa). Ibid., tome 97, pp. 133-136. Translation 5 pp. by Julius Rockwell, Jr., available FRI.

(35) Bervald, E. A. 1952.
Productivity of fishing waters and fluctuations in the abundance of stocks of commercial fishes (in Russian). Zool. Zhur., vol. 31, no. 1, pp. 82-91. Abstract translation 6 pp. by G. Mares, available PBS.

(36) Besnard, W. 1950.
Nota preliminar sobre uma particularidade da biologia de Sardinella aurita Cuv. and Val., da costa brasileira (Preliminary note on a peculiarity of the biology of Sardinella aurita of the Brazilian coast). Bol. Inst. Paulista Oceanogr., tomo 1, fasc. 1, pp. 69-80. Translation summary by G. Mares, available PBS.

(37) Biedermann, W. 1911.
Die Ernahrung der Fische (The feeding of fishes). Handbuch Vergleich. Physiol., Bd. 2, Hälfte 1, Elfter Teil, S. 1049-1115. Translation 41 pp., available FWS.

(38) Bjerkan, Paul. 1928.
Brislingundersøkelse(Brisling investigations). Årsberet. vedk. Norges Fisk. 1927 (1928), nr. 1, s. 115-127. Translation 16 pp. by BMAF, available FWS.

(39) Bobrinskii, N.A. 1944.
The order Pinnipeda (in Russian). In Key to the mammals of the SSSR, Moscow, State Publishing Co. pp. 162-178. Translation 26 pp. by C. D. Jackson for the Bureau of Animal Population, Oxford Univ., England, available ABS.

(40) Bouvier, E. L. 1914.
Recherches sur le développement post embryonnaire de la langouste commune (Palinurus vulgaris) / Research on the post-embryonic development of the common spiny lobster, (Palinurus vulgaris) /. Jour. Mar. Biol. Ass. U. K., N. S., vol. 10, pp. 179-193. Translation 6 pp. by D. D. Seaton, available SHD.

SUBJECT INDEX

BIOLUMINESENCE: 267
BOTTOM FAUNA
Azov Sea: 202
Barents Sea: 10, 307
Black Sea: 202
CRUSTACEA
Africa: 181
Biometry: 94
Calanus finmarchicus: 102
Carcinus maenas: 70, 94
Chile: 29
Cladocera: 205
Copepoda: 82, 83, 102
Denmark: 44
Green crab: 70, 94
Isopod: 273
Jasus frontalis: 29
Larvae: 130
Lobster: 44, 74
Lobster culture: 74
Mexico: 98
Mytilicola intestinalis: 83, 192
Norway lobster: 175, 176
Oxygen consumption: 287
Palinurus vulgaris: 40
Riggia paranensis: 273
Shrimp: 98
Spiny lobster: 29, 40, 173, 181
FISH
Age: 6, 88, 107, 141, 165
Air bladder: 179, 270
Alosa finta: 72
Amur Basin: 135, 156
Anarhichus lupus: 31
Anguilla vulgaris: 88
Baltic: 170, 171
Barents Sea: 207
Brama rayi: 45
Brazil: 36
Brisling: 38
Cloaca: 179
Clupea sprattus: 38, 170, 171, 226
Cod: 207, 214
Disease: 180

Dog salmon: 135
Eel: 88, 241
Eggs and larvae: 86, 112, 130, 223, 265
Elbe estuary: 226
Electrical stimulation: 120, 201
Estimating numbers of young: 281
Faroes: 146
Fecundity: 5, 210
Fish stocks: 35, 203
Frisian Islands: 69
German Bight: 138, 140
Greenland: 214
Growth: 6, 72, 76, 107, 164, 197
Habitat: 128
Habitat recognition: 91
Haddock: 207
Herring: 67, 76, 79, 80, 113, 122, 125, 133, 134, 142, 143, 165, 166, 167, 179, 198, 210, 225, 226, 242, 250, 251, 270, 271, 284
Herring fat content: 46, 47, 48, 304
Herring larvae: 3, 68, 69, 139, 225
Herring protein content: 49
Hokkaido: 133, 134
Hybridization: 95
Hydrobiology and fish: 208
Hypophysis: 67, 110
Italy: 72
Japan: 134
Kamtchatka: 156
Lamprey: 292
Lampris guttatis: 9, 187
Lepibema chrysops: 290
Light reaction: 233
Lucioperca lucioperca: 272
Marking: 34
Mediterranean: 211
Migrations: 8, 87, 92, 93, 122, 172, 222, 229, 243
Morone americana: 291
Nematodes: 146, 213
North Sea: 76, 125, 142, 143, 160, 161, 167
Norway: 38, 80
Norwegian Sea: 79
Nutrition: 37, 92, 93, 135, 166, 207, 241, 260, 306
Oncorhynchus keta: 135, 164
Osmotic adaptability: 33, 34, 298, 305
Otoliths: 165, 179
Parasites: 146, 174, 213, 273, 274, 275
Physiology: 302
Plaice: 138, 140
Portugal: 222
Quebec: 290, 291, 292
Redfish: 141, 174
Remora: 276
Reservoirs: 203
Russia: 7, 31, 135, 156, 164, 210, 259, 272, 282, 304
Salmo fario: 295
Salmo hucho: 107
Salmo iridea: 95
Salmon: 135, 156, 164, 223, 243, 265, 288, 298, 300
Salvelinus fontinalis: 95
Sardina pilchardus: 5, 6, 211, 218, 222
Sardinella aurita: 36
Scorpaenidae: 7
Sebastes marinus: 141, 174
Smelts: 282
Spain: 218
Sturgeon: 169, 306
Sunfish: 126
Sweden: 300
Temperature-oxygen reaction: 169
Tevere Lakes: 72
Thyroid: 67
Transport by currents: 122, 126
Trout: 95, 100, 107, 288, 294, 295, 300
Tunny: 24, 160, 161, 186
Venezuela: 100
Whitefish: 259
White Sea: 31
Wolf-fish: 31
Zuider Zee: 76

FISHERIES
Baltic: 189
Czechoslovakia: 109
Denmark: 297
Drift nets: 26, 255
Echo-sounding: 11, 14, 17, 18, 65, 96, 97, 183, 188, 195, 216, 228, 229, 230, 231, 237, 238, 246, 249, 252, 253, 255
Electrical fishing: 71, 108, 117, 121, 145, 151, 152, 153, 154, 155, 184, 190, 191, 201, 240, 294
Finkenwarder: 89
Fischlupe: 11, 17, 18
Fish meal: 258
Germany: 30, 185, 204, 296
Herring quality determination: 301
Herring trawls: 55, 189, 193, 244, 245, 247, 248, 296, 297
Hokkaido: 133
Indian Ocean: 77
Japan: 25, 133, 268
Mesh measurements: 54, 75, 224
Mid-water trawl: 12, 51, 52, 58, 59, 62, 63
Miscellaneous fishing gear: 19, 20, 22, 23, 61, 162
North Pacific: 25
North Sea: 178, 193, 297
Nylon nets: 22
Perlon lines: 131
Role of hydrobiology: 163
Salmon: 26
Saran nets: 61
Sea temperatures: 217
Set nets: 26
Shetland Islands: 89
Shrimp: 98
Sisal nets: 64
Spain: 217
Spiny lobster: 175, 176
Trawling gear: 1, 15, 16, 21, 50, 51, 53, 55, 56, 57, 106, 159, 182, 189, 191, 220, 227, 232, 234, 235, 236, 238, 239, 285, 286
Tropical fish: 77
Tunny: 30, 145, 190
Underwater sound: 60
Use of artificial light: 23, 144, 209, 254
Use of sound pressure waves: 254
Vessel tank tests: 283
World distribution: 177
Yap: 268
FOULING
Black Sea: 105
LIMNOLOGY
Basin of Cordoba: 73
Krzyzaki Lake: 42
Mexico: 277
Patzcuaro Lake: 277
Poland: 42
